

Economic Growth Region 11

Statistical Data Report for October 2012, Released December 2012

Regional and State Unemployment (seasonally adjusted)

Regional and state unemployment rates were little changed in October. Thirty-seven states and the District of Columbia recorded unemployment rate decreases, seven states posted rate increases, and six states had no change, the U.S. Bureau of Labor Statistics reported. Forty-two states and the District of Columbia registered unemployment rate decreases from a year earlier, while eight states experienced increases. The national jobless rate, 7.9 percent, was essentially unchanged from September but was 1.0 percentage point lower than in October 2011.

State Employment and Unemployment Report

Indiana nearly doubled the national rate of job growth in October, adding 7,700 private sector jobs. This marks the largest monthly gain since May. Private sector employment in the Hoosier state is now at more than 96 percent of the 2007 pre-recession levels.

Significant October job gains also resulted in a drop in Indiana's unemployment rate. Unemployment decreased to 8.0 percent from 8.2 percent in September, the largest one month decrease since April.
